The SureNail® Difference—
A technological breakthrough in roofing

The innovative features of Owens Corning™ TruDefinition™ Duration® Shingles with SureNail® Technology offer the following:

**Breakthrough Design**
Featuring a tough, woven engineered reinforcing fabric to deliver consistent fastening during installation.

**Triple Layer Protection™**
A unique “triple layer” of reinforcement occurs when the fabric overlays the common bond of the shingle laminate layers that offers excellent fastener holding power.

**Superior Adhesion**
Our enhanced Tru-Bond™ sealant grips tightly to the engineered fabric nailing strip on the shingle below.

**Excellent Adhesive Power**
Specially formulated, wide adhesive bands help keep shingle layers laminated together.

**Exceptional Wind Resistance**
The industry’s first asphalt roofing shingle engineered to deliver 130-MPH™ wind warranty performance with only 4 nails. Fewer nails required can mean fewer deck penetrations.
